

Anti-OX40L/TNFSF4 antibody [MM0505-8S23] - BSA and Azide free ab89896

★★★★★ [1 Abreviews](#) [3 References](#)

概述

产品名称	Anti-OX40L/TNFSF4抗体[MM0505-8S23] - BSA and Azide free
描述	小鼠单克隆抗体[MM0505-8S23] to OX40L/TNFSF4 - BSA and Azide free
宿主	Mouse
经测试应用	适用于: IHC-P, IHC-Fr, Flow Cyt, Neutralising
种属反应性	与反应: Human, Cynomolgus monkey
免疫原	Recombinant full length Human CD252
常规说明	<p>The antibody is specific to OX40L.</p> <p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As</p>

性能

形式	Lyophilized:Reconstitute with 200µl PBS
存放说明	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.
存储溶液	Constituent: PBS
无载体	是
纯度	Protein G purified
纯化说明	filter sterilised.
克隆	单克隆
克隆编号	MM0505-8S23
同种型	IgG1

应用

The Abpromise guarantee **Abpromise™** 承诺保证使用 ab89896 于以下的经测试应用

“应用说明”部分 下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
IHC-P	★★★★★ (1)	Use at an assay dependent concentration.
IHC-Fr		Use at an assay dependent concentration.
Flow Cyt		Use at an assay dependent concentration. ab170190 - Mouse monoclonal IgG1, is suitable for use as an isotype control with this antibody.
Neutralising		Use at an assay dependent concentration. Proliferation of human PBMCs elicited by TNFSF4 (25ng/mL) can be neutralized by increasing concentrations of ab89896 in a dose-dependent manner. The ED50 is between 40-80ng/mL.

靶标

功能	Cytokine that binds to TNFRSF4. Co-stimulates T-cell proliferation and cytokine production.
疾病相关	Genetic variations in TNFSF4 influence susceptibility to systemic lupus erythematosus (SLE) [MIM:152700]. SLE is a chronic, inflammatory and often febrile multisystemic disorder of connective tissue. It affects principally the skin, joints, kidneys and serosal membranes. It is thought to represent a failure of the regulatory mechanisms of the autoimmune system. Note=The upstream region of TNFSF4 contains a single risk haplotype for SLE, which is correlated with increased expression of both cell-surface TNFSF4 and TNFSF4 transcripts. Increased levels of TNFSF4 are thought to augment T cell-APC interaction and the functional consequences of T cell activation, thereby destabilizing peripheral tolerance.
序列相似性	Belongs to the tumor necrosis factor family.
细胞定位	Membrane.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.cn/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
