

Product datasheet

Anti-ATP7A antibody ab42486

1 References 2 图像

概述

|       |   |
|-------|---|
| 产品名称  | Anti-ATP7A抗体  |
| 描述    | 兔多克隆抗体to ATP7A  |
| 宿主    | Rabbit  |
| 经测试应用 | 适用于: ICC/IF, WB, IHC-P  |
| 种属反应性 | 与反应: Human<br>预测可用于: Mouse, Cat, Dog, Chimpanzee    |
| 免疫原   | Synthetic peptide corresponding to Human ATP7A. Short peptide sequence used to raise this antibody is 100% homologous to isoform 4 (1500aa, 163kDa), 1 (1514aa, 165kDa), 2 (1581aa, 172kDa), 5 (1422aa, 154kDa) of human ATP7A<br>Database link: <a href="#">Q04656</a> |
| 阳性对照  | WB: HepG2 cell lysate. IHC-P: Human kidney  |

性能

|      |   |
|------|---|
| 形式   | Liquid  |
| 存放说明 | Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles. |
| 存储溶液 | Preservative: None<br>Constituents: 2% Sucrose, PBS                                   |
| 纯度   | Immunogen affinity purified   |
| 克隆   | 多克隆   |
| 同种型  | IgG   |

应用

Our [Abpromise guarantee](#) covers the use of **ab42486** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

| 应用     | Ab评论 | 说明                              |
|--------|------|---------------------------------|
| ICC/IF |      | Use a concentration of 5 µg/ml. |

| 应用    | Ab评论 | 说明   |
|-------|------|--|
| WB    |      | Use a concentration of 0.5 µg/ml. Predicted molecular weight: 30 kDa. Good results were obtained when blocked with 5% non-fat dry milk in 0.05% PBS-T. |
| IHC-P |      | Use at an assay dependent concentration.   |

## 靶标

|              |   |
|--------------|---|
| <b>功能</b>    | May supply copper to copper-requiring proteins within the secretory pathway, when localized in the trans-Golgi network. Under conditions of elevated extracellular copper, it relocated to the plasma membrane where it functions in the efflux of copper from cells.   |
| <b>组织特异性</b> | Found in most tissues except liver. Isoform 3 is widely expressed including in liver cell lines. Isoform 1 is expressed in fibroblasts, choriocarcinoma, colon carcinoma and neuroblastoma cell lines. Isoform 2 is expressed in fibroblasts, colon carcinoma and neuroblastoma cell lines.   |
| <b>疾病相关</b>  | <p>Defects in ATP7A are the cause of Menkes disease (MNKD) [MIM:309400]; also known as kinky hair disease. MNKD is an X-linked recessive disorder of copper metabolism characterized by generalized copper deficiency. MNKD results in progressive neurodegeneration and connective-tissue disturbances: focal cerebral and cerebellar degeneration, early growth retardation, peculiar hair, hypopigmentation, cutis laxa, vascular complications and death in early childhood. The clinical features result from the dysfunction of several copper-dependent enzymes.</p> <p>Defects in ATP7A are the cause of occipital horn syndrome (OHS) [MIM:304150]; also known as X-linked cutis laxa. OHS is an X-linked recessive disorder of copper metabolism. Common features are unusual facial appearance, skeletal abnormalities, chronic diarrhea and genitourinary defects. The skeletal abnormalities included occipital horns, short, broad clavicles, deformed radii, ulnae and humeri, narrowing of the rib cage, undercalcified long bones with thin cortical walls and coxa valga.</p> <p>Defects in ATP7A are a cause of distal spinal muscular atrophy X-linked type 3 (DSMAX3) [MIM:300489]. DSMAX3 is a neuromuscular disorder. Distal spinal muscular atrophy, also known as distal hereditary motor neuronopathy, represents a heterogeneous group of neuromuscular disorders caused by selective degeneration of motor neurons in the anterior horn of the spinal cord, without sensory deficit in the posterior horn. The overall clinical picture consists of a classical distal muscular atrophy syndrome in the legs without clinical sensory loss. The disease starts with weakness and wasting of distal muscles of the anterior tibial and peroneal compartments of the legs. Later on, weakness and atrophy may expand to the proximal muscles of the lower limbs and/or to the distal upper limbs.</p> |
| <b>序列相似性</b> | Belongs to the cation transport ATPase (P-type) (TC 3.A.3) family. Type IB subfamily. Contains 6 HMA domains.   |
| <b>结构域</b>   | The C-terminal di-leucine, 1487-Leu-Leu-1488, is an endocytic targeting signal which functions in retrieving recycling from the plasma membrane to the TGN. Mutation of the di-leucine signal results in the accumulation of the protein in the plasma membrane.  |
| <b>细胞定位</b>  | Endoplasmic reticulum; Cytoplasm > cytosol and Golgi apparatus > trans-Golgi network membrane. Cell membrane. Cycles constitutively between the trans-Golgi network (TGN) and the plasma membrane. Predominantly found in the TGN and relocalized to the plasma membrane in response to elevated copper levels.   |

Immunohistochemistry (Paraffin-embedded sections)  
- ATP7A antibody (ab42486)

Antibody ab42486 (4.0-8.0 ug/ml)  
immunohistochemistry staining of paraffin  
embedded human kidney. Positive staining of  
epithelial cells of human renal tubules idicated  
by arrows.

Antibody ab42486 (4.0-8.0 ug/ml)  
immunohistochemistry staining of paraffin  
embedded human kidney. Positive staining of  
epithelial cells of human renal tubules idicated  
by arrows.

Immunocytochemistry/ Immunofluorescence - Anti-  
ATP7A antibody (ab42486)

ICC/IF image of ab42486 stained Mcf7 cells.  
The cells were 4% formaldehyde fixed (10  
min) and then incubated in 1%BSA / 10%  
normal goat serum / 0.3M glycine in 0.1%  
PBS-Tween for 1h to permeabilise the cells  
and block non-specific protein-protein  
interactions. The cells were then incubated  
with the antibody (ab42486, 5µg/ml) overnight  
at +4°C. The secondary antibody (green) was  
Alexa Fluor® 488 goat anti-rabbit IgG (H+L)  
used at a 1/1000 dilution for 1h. Alexa Fluor®  
594 WGA was used to label plasma  
membranes (red) at a 1/200 dilution for 1h.  
DAPI was used to stain the cell nuclei (blue) at  
a concentration of 1.43µM.

**Please note:** All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

### Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <http://www.abcam.cn/abpromise> or contact our technical team.

## Terms and conditions

---

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
