Superoxide Dismutase Activity Assay Kit (Colorimetric) ab65354

★★★★★ 2 Abreviews 242 References 4 图像

概述

产品名称 Superoxide Dismutase Activity Assay试剂盒(Colorimetric)

检测方法 Colorimetric

样品类型 Urine, Serum, Plasma, Other biological fluids, Tissue Extracts, Cell Lysate, Cell culture media

检测类型 Enzyme activity

检测时间 0h 30m

种属反应性 与反应: Mammals, Other species

产品概述 Superoxide Dismutase Activity Assay Kit (Colorimetric) ab65354 is a simple and rapid assay for

superoxide dismutase (SOD) activity.

In the SOD assay protocol:

- superoxide anions are produced by the action of xanthine oxidase

- SOD catalyzes the dismutation of the superoxide anion into hydrogen peroxide and O2

- superoxide anions act on WST-1 to produce a water-soluble formazan dye which can be detected by the increase in absorbance at 450 nm

The greater the activity of SOD in the sample, the less formazan dye is produced.

Superoxide dismutase assay protocol summary:

- add samples to wells

- add WST-1 working solution and enzyme working solution and incubate for 20 min at 37°C

- analyze with microplate reader

This product is manufactured by BioVision, an Abcam company and was previously called K335

Superoxide Dismutase (SOD) Activity Colorimetric Assay Kit. K335-100 is the same size as the

100 test size of ab65354.

Superoxide dismutase (SOD) is one of the most important antioxidative enzymes. It catalyzes the

dismutation of the superoxide anion into hydrogen peroxide and molecular oxygen.

说明

存放说明

Store at -20°C. Please refer to protocols.

组 件	100 tests	2000 tests
SOD Assay Buffer	1 x 20ml	20 x 20ml
SOD Dilution Buffer	1 x 10ml	20 x 10ml
SOD Enzyme Solution	1 vial	20 vials
WST Reagent II	1 x 1ml	20 x 1ml

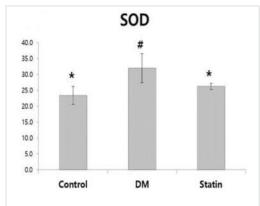

相关性

Superoxide dismutase (SOD) is an antioxidant enzyme involved in the defense system against reactive oxygen species (ROS). SOD catalyzes the dismutation reaction of superoxide radical anion (O_2 -) to hydrogen peroxide, which is then catalyzed to innocuous O_2 and O_2 and O_3 by glutathione peroxidase and catalase. Several classes of SOD have been identified. These include intracellular copper, zinc SOD (Cu, Zn SOD/SOD1), mitochondrial manganese SOD (Mn SOD/SOD2) and extracellular Cu, Zn SOD (EC SOD/SOD3).

Park J et al investigates the recovery in erectile function after administration of chronic statin alone in DM (streptozotocin (STZ)-induced diabetes mellitus) rats. SOD activity was determined using Superoxide Dismutase activity assay kit (ab65354).

* Indicates statistical significance in comparison with DM group (P < 0.05). # Indicates statistical significance in comparison with the statin group (P<0.05).

Our Abpromise to you: Quality guaranteed and expert technical support

- · Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- · Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.cn/abpromise or contact our technical team.

Terms and conditions

· Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
