Human IL-1 alpha ELISA Set (without plates) ab47350

1 图像

概述

产品名称人IL-1 alpha ELISA试剂盒(without plates)样品类型Cell culture supernatant, Serum, Plasma

检测类型 Sandwich (quantitative)

灵敏度 < 10 pg/ml

范围 31.25 pg/ml - 1000 pg/ml

检测时间 3h 45m

实验步骤 Multiple steps standard assay

种属反应性 与反应: Human

产品概述 Abcam's IL-1α Human in vitro ELISA Set is designed for the quantitative measurement of IL-1α in

cell culture supernatants, buffered solutions, serum, plasma and other body fluids.

This ELISA set is intended to measure human IL-1 alpha in cell -culture supernatants, as well as in serum and plasma samples. The enclosed procedures provide general guidelines for ELISA preparation. This procedure may need some optimization depending on the plastic, matrix,

standard range.

The IL-1 alpha ELISA set includes both the capture and the detection antibodies as well as Horse-Radish peroxidase conjugated Streptavidin (HRP-Strep) and TMB which are the reagents used in

the colour development step.

Recognizes both natural and recombinant human IL-1a.

经测试应用 适用于: Sandwich ELISA

平台 Reagents

性能

存放说明 Store at +4°C. Please refer to protocols.

| 组 件 | 标识 符 | 5 x 96 tests | 10 x 96 tests | 15 x 96 tests |
|-------------------------------------------------|-------------|--------------|---------------|---------------|
| Detection biotinylated anti-IL-1 alpha antibody | | 1 x 0.55ml | 2 x 0.55ml | 3 x 0.55ml |
| IL-1 alpha Capture antibody | | 1 x 0.1ml | 2 x 0.1ml | 3 x 0.1ml |
| IL-1 alpha Standard (Lyophilized) | Yellow | 5 vials | 10 vials | 15 vials |
| Streptavidin-HRP | | 1 vial | 2 vials | 3 vials |

相关性

IL-1 is a member of the interleukin 1 cytokine family. This cytokine is a pleiotropic cytokine involved in various immune responses, inflammatory processes, and hematopoiesis. This cytokine is produced by monocytes and macrophages as a proprotein, which is proteolytically processed and released in response to cell injury, and thus induces apoptosis. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. It has been suggested that the polymorphism of these genes is associated with rheumatoid arthritis and Alzheimer's disease.

应用

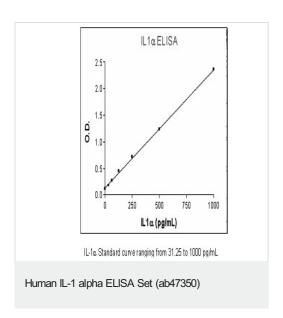

The Abpromise guarantee <u>Abpromise™</u>承诺仍

Abpromise™承诺保证使用ab47350于以下的经测试应用

"应用说明"部分 下显示的仅为推荐的起始稀释度:实际最佳的稀释度/浓度应由使用者检定。

| 应用 | Ab评论 | 说明 |
|----------------|------|------------------------------------------|
| Sandwich ELISA | | Use at an assay dependent concentration. |

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.cn/abpromise or contact our technical team.

Terms and conditions

· Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
