#### 概述

产品名称 Anti-Acinus抗体

描述 兔多克隆抗体to Acinus

**宿主** Rabbit

特异性 The antibody recognises three different splice forms of Acinus, designated Acinus L, Acinus S

and Acinus S'. The epitope is a region near the C-terminus of the cleaved active peptide p17.

经测试应用 适用于: ICC/IF, WB

种属反应性 与反应: Human

**免疫原** Synthetic peptide:

**TRTALHGVKWPQSNPK** 

, corresponding to amino acids 1065-1080 of Human Acinus or 307 to 322 of human AcinusS, which are identical to those of mouse Acinus (2). The selected antigenic sequence is locatednear

the C-terminus of the cleaved active peptide p17.

Run BLAST with

阳性对照 K562 whole cell lysate.

常规说明

The Life Science industry has been in the grips of a reproducibility crisis for a number of years.

Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

性能

形式 Liquid

存放说明 Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw

cycles.

**存储溶液** pH: 7.2

Preservative: 0.02% Sodium azide

纯**度** Immunogen affinity purified

纯**化**说明 Purified IgG was prepared from whole serum by affinity chromatography.

1

**克隆** 多克隆

**同种型** IgG

#### 应用

## The Abpromise guarantee Abpromise™承诺保证使用ab7352于以下的经测试应用

"应用说明"部分下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
ICC/IF		Use a concentration of 10 μg/ml.
WB	★ ★ ★ 前 前 (1)	Use at an assay dependent concentration. Detects a band of approximately 220 kDa (predicted molecular weight: 151 kDa).Can be blocked with <b>Acinus peptide (ab8367)</b> .

#### 靶标

功能 Component of a splicing-dependent multiprotein exon junction complex (EJC) deposited at splice

junction on mRNAs. The EJC is a dynamic structure consisting of a few core proteins and several more peripheral nuclear and cytoplasmic associated factors that join the complex only transiently either during EJC assembly or during subsequent mRNA metabolism. Induces apoptotic

chromatin condensation after activation by CASP3.

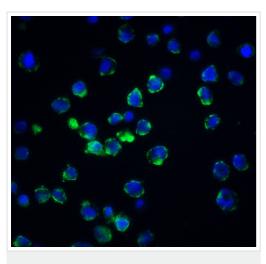

组织特异性 Ubiquitous.

序列相似性 Contains 1 SAP domain.

翻译后修饰 Undergoes proteolytic cleavage; the processed form is active, contrary to the uncleaved form.

细胞定位 Nucleus.

### Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- · Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <a href="https://www.abcam.cn/abpromise">https://www.abcam.cn/abpromise</a> or contact our technical team.

#### Terms and conditions

· Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
