应用	Ab评论	说明
ICC		Use at an assay dependent concentration.
WB		Use at an assay dependent concentration.

靶标

相关性	HTR12 is a histone H3-like variant which exclusively replaces conventional H3 in the nucleosome core of centromeric chromatin at the inner plate of the kinetochore. It is required for recruitment and assembly of kinetochore proteins, mitotic progression and chromosome segregation and may serve as an epigenetic mark that propagates centromere identity through replication and cell division.
细胞定位	Nucleus. Centromere. Kinetochore. Note=Localizes exclusively in the kinetochore domain of centromeres.
