Anti-FOXP1 antibody [JC12] ab32010

★★★★★ <u>5 Abreviews</u> <u>37 References</u> 4 图像

概述

产**品名称** Anti-FOXP1抗体[JC12]

描述 小鼠单克隆抗体[JC12] to FOXP1

宿主 Mouse

适用于: IHC-P, WB

种属反应性 与反应: Human

预测可用于: Mouse, Zebra finch 4

免疫原 Full length native protein (purified) corresponding to Mouse FOXP1.

阳性对照 WB: BCBL1 human cell line or Mutul human cell line. IHC-P: Human Hodgkin's lymphoma and

human colon tissues.

常规说明 This antibody clone is manufactured by Abcam. If you require a custom buffer formulation or

conjugation for your experiments, please contact orders@abcam.com.

The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

性能

形式 Liquid

存放说明 Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -

80°C. Avoid freeze / thaw cycle.

存储溶液 pH: 7.40

Preservative: 0.02% Sodium azide Constituents: 6.97% L-Arginine, PBS

纯**度** Protein G purified

 克隆
 单克隆

 克隆编号
 JC12

1

同种型 lgG2a

应用

The Abpromise guarantee Abpromise™承诺保证使用ab32010于以下的经测试应用

"应用说明"部分下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
IHC-P	★★ ☆☆☆ (1)	Use a concentration of 0.1 µg/ml. Perform heat mediated antigen retrieval with citrate buffer pH 6 before commencing with IHC staining protocol.
WB	★★★★ (3)	1/500. Predicted molecular weight: 75 kDa.

靶标

功能 Transcriptional repressor. It plays an important role in the specification and differentiation of lung

epithelium. Can act with CTBP1 to synergistically repress transcription but CTPBP1 is not

essential. Essential transcriptional regulator of B cell development.

疾病相关 Note=A chromosomal aberration involving FOXP1 is found in acute lymphoblastic leukemia.

Translocation t(9;3)(p13;p14.1) with PAX5.

Defects in FOXP1 are the cause of mental retardation with language impairment and autistic features (MRLIAF) [MIM:613670]. It is a developmental disorder characterized by mild to moderate mental retardation, language impairment, and autistic features. Patients show global delay, delayed walking, severely delayed speech development, and behavioral abnormalities,

including irritability, hyperactivity, aggression, and stereotypical rigid behaviors.

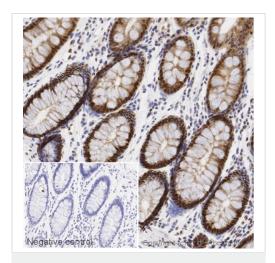

序列相似性 Contains 1 C2H2-type zinc finger.

Contains 1 fork-head DNA-binding domain.

结**构域** The leucine-zipper is required for dimerization and transcriptional repression.

细胞定位 Nucleus.

图片

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-FOXP1 antibody [JC12] (ab32010)

IHC image of FOXP1 staining in a section of formalin-fixed paraffinembedded normal human colon*. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH6, epitope retrieval solution 1) for 20 mins. The section was then incubated with ab32010, 0.1 ug/ml, for 15 mins at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

The inset negative control image is taken from an identical assay without primary antibody.

For other IHC staining systems (automated and non-automated) customers should optimize variable parameters such as antigen retrieval conditions, primary antibody concentration and antibody incubation times.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-FOXP1 antibody [JC12] (ab32010)

IHC image of FOXP1 staining in a section of formalin-fixed paraffinembedded normal human Hodgkin's lymphoma (CD30+)*, showing positive staining in the mantle zone and negative staining in the Hodgkin's cells and germinal centre. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH6, epitope retrieval solution 1) for 20 mins. The section was then incubated with ab32010, 0.1ug/ml, for 15 mins at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Western blot - Anti-FOXP1 antibody [JC12] (ab32010)

All lanes: Anti-FOXP1 antibody [JC12] (ab32010) at 1/500 dilution

Lane 1 : BCBL1 human cell line
Lane 2 : Mutul human cell line

Predicted band size: 75 kDa

Observed band size: 60,65,80 kDa

This antibody recognizes a long form and two short forms of human FOXP1 as described in Blood. 2008. Mar 1; 111(5): 2816-24.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- · We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.cn/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
