

Anti-Melanoma Associated Antigen 100+ / 25kDa antibody [NKI-C3] ab90739

概述

产品名称	Anti-Melanoma Associated Antigen 100+ / 25kDa抗体[NKI-C3]
描述	小鼠单克隆抗体[NKI-C3] to Melanoma Associated Antigen 100+ / 25kDa
宿主	Mouse
经测试应用	适用于: ELISA, IHC-Fr, ICC, IHC-P
种属反应性	与反应: Human
免疫原	Tissue, cells or virus corresponding to Human Melanoma Associated Antigen 100+/ 25kDa. Immunized with a predominantly intracellular protein of human melanoma cells.
阳性对照	Human Melanoma tissue.
常规说明	<p>We are constantly working hard to ensure we provide our customers with best in class antibodies. As a result, we are pleased to offer this antibody in a purified format as of 27th October 2017. Purified antibodies have the advantage of being enriched for the fraction of immunoglobulin that specifically reacts with the target antigen and for having a reduction of serum proteins.</p> <p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As</p>

性能

形式	Liquid
存放说明	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid repeated freeze / thaw cycles.
存储溶液	Preservative: 0.09% Sodium azide Constituent: PBS
纯度	Affinity purified
纯化说明	From tissue culture supernatant
克隆	单克隆
克隆编号	NKI-C3

骨髓瘤 Sp2/0

同种型 IgG1

应用

The Abpromise guarantee **Abpromise™**承诺保证使用ab90739于以下的经测试应用

“应用说明”部分 下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
ELISA		Use at an assay dependent concentration.
IHC-Fr		Use at an assay dependent concentration.
ICC		Use at an assay dependent concentration.
IHC-P		Use at an assay dependent concentration.

靶标

相关性 Melanoma-associated antigens (MAAs) are highly immunogenic human antigens that are recognized by cytotoxic T lymphocytes (CTLs). Both ocular and skin melanomas are derived from normal melanocytes that originate from the neural crest, although the melanocytes of the eye are functionally and morphologically distinct. Both types of melanomas carry a wide range of MAAs. Melanoma Associated Antigen 100+ / 25kDa is mainly present in the cytoplasm of melanoma cells and nevocellular nevi.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.cn/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
