WB		1/500 - 1/3000. Predicted molecular weight: 35 kDa.

靶标

相关性 Although the function of this gene is not known, its existence is supported by mRNA and EST data. The predicted gene product contains a region similar to the STAR-related lipid transfer (START) domain, which is often present in proteins involved in the cell signalling mediated by lipid binding. Two alternatively spliced transcript variants that encode an identical protein have been reported.

Note: the lower band observed corresponds to the expected band size (~35 kDa) for the NCBI accession (AAH07894) and the unreviewed UniProt/TrEMBL protein (A8K575).

The band observed in the middle of the gel corresponds to the expected band size (~43 kDa) for the reviewed UniProt protein (Q9NQZ5).
