Product datasheet

Recombinant human Thioredoxin / TRX protein ab95319

1 图像

描述

产品名称 重组人Thioredoxin / TRX蛋白

生物活性 Specific activity is 7-10 A650/min/mg, obtained by measuring the increase of insulin precipitation

in absorbance at 650 nm resulting from the reduction of insulin. Specific activity is 7-10

A650/min/mg, obtained by measuring the increase of insulin precipitation in absorbance at 650

nm resulting from the reduction of insulin.

纯**度** > 95 % SDS-PAGE.

ab95319 is purified using conventional chromatography techniques.

表达系统 Escherichia coli

蛋白长度 Full length protein

无动物成分 No

性质 Recombinant

种属 Human

技术指标

Our Abpromise guarantee covers the use of ab95319 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

应用 Functional Studies

SDS-PAGE

形式 Liquid

制备和贮存

稳定性和存储 Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Store in the dark. Avoid

repeated freeze / thaw cycles.

pH: 7.40

Constituent: PBS

This product is an active protein and may elicit a biological response in vivo, handle with caution.

常规信息

1

功能

Participates in various redox reactions through the reversible oxidation of its active center dithiol to a disulfide and catalyzes dithiol-disulfide exchange reactions. Plays a role in the reversible S-nitrosylation of cysteine residues in target proteins, and thereby contributes to the response to intracellular nitric oxide. Nitrosylates the active site Cys of CASP3 in response to nitric oxide (NO), and thereby inhibits caspase-3 activity. Induces the FOS/JUN AP-1 DNA-binding activity in ionizing radiation (IR) cells through its oxidation/reduction status and stimulates AP-1

ADF augments the expression of the interleukin-2 receptor TAC (IL2R/P55).

序列相似性 Belongs to the thioredoxin family.

Contains 1 thioredoxin domain.

transcriptional activity.

翻译后修饰

In the fully reduced protein, both Cys-69 and Cys-73 are nitrosylated in response to nitric oxide (NO). When two disulfide bonds are present in the protein, only Cys-73 is nitrosylated. Cys-73 can serve as donor for nitrosylation of target proteins.

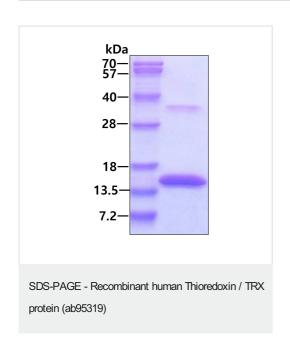

In case of infection, ubiquitinated by S.typhimurium protein slrP, leading to its degradation.

细胞定位

Nucleus. Cytoplasm. Secreted. Secreted by a leaderless secretory pathway. Predominantly in the cytoplasm in non irradiated cells. Radiation induces translocation of TRX from the cytoplasm to

the nucleus.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- · Valid for 12 months from date of delivery
- · Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you

• We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.cn/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
