应用说明

Dot: Use at an assay dependent dilution.

Electron Microscopy: Use at an assay dependent dilution.

ELISA: 1/20000 - 1/200000.

IHC: 1/500 - 1/5000.

WB: 1/20000 - 1/200000.

This product has been assayed against 1.0 µg of Rat IgG in a standard capture ELISA using ABTS (2,2'-azino-bis-[3-ethylbenzothiazoline-6-sulfonic acid]) as a substrate for 30 minutes at room temperature. A working dilution of 1/20000 to 1/200000 of the reconstitution concentration is suggested for this product for ELISA and Western blots and a 1/500 to 1/5000 for immunohistochemistry on tissue sections.

Suitable for other peroxidase-antibody based enzymatic assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity.

Not tested in other applications.

Optimal dilutions/concentrations should be determined by the end user.
