### 应用说明

Dot: Use at an assay dependent dilution.

Electron Microscopy: Use at an assay dependent dilution.

ELISA: 1/4000 - 1/16000.

IHC: Use at an assay dependent dilution.

WB: Use at an assay dependent dilution.

This product has been assayed against 1.0 µg of Rat IgG in a standard capture ELISA using ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) as a substrate for 30 minutes at room temperature. A working dilution of 1/4000 to 1/16000 of the reconstitution concentration is suggested for this product.

Suitable for other peroxidase-antibody based enzymatic assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity.

Not tested in other applications.

Optimal dilutions/concentrations should be determined by the end user.
