应用

Our [Abpromise guarantee](#) covers the use of **ab11730** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

应用	Ab评论	说明
Flow Cyt		
应用说明	Flow Cyt: Use 10 µl of undiluted antibody to label 10 ⁶ cells in 100 µl. This antibody may be used for the flow cytometric detection of myeloid cells following membrane permeabilisation. Not tested in other applications. Optimal dilutions/concentrations should be determined by the end user.	
靶标		
功能	Part of the host defense system of polymorphonuclear leukocytes. It is responsible for microbicidal activity against a wide range of organisms. In the stimulated PMN, MPO catalyzes the production of hypohalous acids, primarily hypochlorous acid in physiologic situations, and other toxic intermediates that greatly enhance PMN microbicidal activity.	
疾病相关	Defects in MPO are the cause of myeloperoxidase deficiency (MPD) [MIM:254600]. MPD is an autosomal recessive defect that results in disseminated candidiasis.	
序列相似性	Belongs to the peroxidase family. XPO subfamily.	
细胞定位	Lysosome.
