产品概述 FRAP Assay Kit ab234626 provides a quick, sensitive and easy way for measuring the

antioxidant capacity of various biological samples. FRAP assay stands for Ferric Reducing

Antioxidant Power Assay.

The FRAP assay is high-throughput, adaptable and can detect antioxidant capacities as low as

0.2 mM Fe²⁺ equivalents.

The assay measures the antioxidant potential in samples through the reduction of ferric iron (Fe³⁺) to ferrous iron (Fe²⁺) by antioxidants present in the samples. Following the reduction of the ferric

iron, a blue color develops that is read colorimetrically at 594 nm.

The antioxidant potential of samples is determined using a ferrous iron standard curve and results

are expressed as Fe²⁺ equivalents (μM) or FRAP value.

说明 This product is manufactured by BioVision, an Abcam company and was previously called K515

Ferric Reducing Antioxidant Power (FRAP) Assay Kit (Colorimetric). K515-200 is the same size

as the 200 test size of ab234626.
