

Anti-Nervous Necrosis Virus antibody ab26812

4 References 1 图像

概述	
产品名称	Anti-Nervous Necrosis Virus抗体
描述	兔多克隆抗体to Nervous Necrosis Virus
宿主	Rabbit
特异性	ab26812 recognises Nervous Necrosis Virus.
经测试应用	适用于: ELISA, WB, Neutralising
种属反应性	与反应: Nervous Necrosis Virus
免疫原	Purified grouper nervous necrosis virus particles.
常规说明	<p>This antibody has been shown to be useful in Virus Neutralization studies using virus particles of NNV.</p> <p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As</p>
性能	
形式	Liquid
存放说明	Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C long term.
纯度	Protein A purified
Primary antibody说明	This antibody has been shown to be useful in Virus Neutralization studies using virus particles of NNV.
克隆	多克隆
同种型	IgG
—	

应用

The Abpromise guarantee **Abpromise™**承诺保证使用ab26812于以下的经测试应用

“应用说明”部分 下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
ELISA		1/10000.
WB		1/5000.
Neutralising		Use at an assay dependent dilution.

靶标

相关性

Viral nervous necrosis (VNN) is a worldwide disease among marine fishes. Fish nervous necrosis virus (NNV) causes high mortality and considerable economic damage to the aquaculture industry. In Taiwan, VNN disease was first identified in 2 species of hatchery-reared grouper, *Epinephelus fuscogutatus* and *E. akaaya* in 1994. Since then, increasing mortalities have occurred among groupers *Epinephelus* spp., and also among European eels *Anguilla anguilla* L., yellow-wax pompano *Trachinotus falcatus*, firespot snapper *Lutjanus erythropterus* B., barramundi *Lates calcarifer*, cobias *Rachycentron canadum*, humpback groupers *Cromileptes altivelis* and Chinese catfish *Parasilurus asotus*.

Nervous Necrosis Virus coat protein detected at 40-45kDa by Western Blot analysis.

All lanes : Anti-Nervous Necrosis Virus antibody (ab26812) at 1/5000 dilution

Lane 1: Negative control

Lane 2: Barfin flounder Nervous Necrosis Virus capsid protein

Lane 3: Redspotted grouper Nervous Necrosis Virus capsid protein

Lane 4: Striped jack Nervous Necrosis Virus capsid protein

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.cn/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
