Anti-nNOS (neuronal) antibody ab5586

★★★★★ 1 Abreviews 12 References 6 图像

概述

产品名称 Anti-nNOS (neuronal)抗体

描述 兔多克隆抗体to nNOS (neuronal)

宿主 Rabbit

经测试应用 适用于: ICC/IF, WB, IHC-P 中属反应性 与反应: Mouse, Rat, Human

预测可用于: Rabbit, Xenopus laevis, Zebrafish 4

免疫原 Synthetic peptide corresponding to Human nNOS (neuronal) aa 1411-1425.

Sequence:

NRLRSESIAFIEESK

(Peptide available as ab5891)

常规说明

The Life Science industry has been in the grips of a reproducibility crisis for a number of years.

Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

性能

形式 Liquid

存放说明 Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -

80°C. Avoid freeze / thaw cycle.

存储溶液 Preservative: 0.05% Sodium azide

Constituents: 0.1% BSA, 99% PBS

纯**度** Immunogen affinity purified

The Abpromise guarantee

Abpromise™承诺保证使用ab5586于以下的经测试应用

"应用说明"部分下显示的仅为推荐的起始稀释度;实际最佳的稀释度/浓度应由使用者检定。

应用	Ab评论	说明
ICC/IF		1/50 - 1/500.
WB		1/100 - 1/1000. Predicted molecular weight: 160 kDa.
IHC-P	★★★☆☆(1)	1/20 - 1/200.

44.	471

功能

Produces nitric oxide (NO) which is a messenger molecule with diverse functions throughout the

body. In the brain and peripheral nervous system, NO displays many properties of a

neurotransmitter. Probably has nitrosylase activity and mediates cysteine S-nitrosylation of

cytoplasmic target proteins such SRR.

组织特异性 lsoform 1 is ubiquitously expressed: detected in skeletal muscle and brain, also in testis, lung and

kidney, and at low levels in heart, adrenal gland and retina. Not detected in the platelets. Isoform 3 is expressed only in testis. Isoform 4 is detected in testis, skeletal muscle, lung, and kidney, at low

levels in the brain, but not in the heart and adrenal gland.

序列相似性 Belongs to the NOS family.

Contains 1 FAD-binding FR-type domain.

Contains 1 flavodoxin-like domain. Contains 1 PDZ (DHR) domain.

结**构域** The PDZ domain in the N-terminal part of the neuronal isoform participates in protein-protein

interaction, and is responsible for targeting nNos to synaptic membranes in muscles. Mediates

interaction with VAC14.

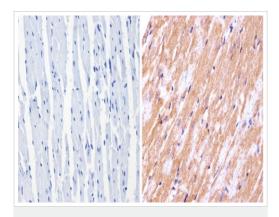

翻译后修饰 Ubiquitinated; mediated by STUB1/CHIP in the presence of Hsp70 and Hsp40 (in vitro).

细胞定位 Cell membrane > sarcolemma. Cell projection > dendritic spine. In skeletal muscle, it is localized

beneath the sarcolemma of fast-twitch muscle fiber by associating with the dystrophin

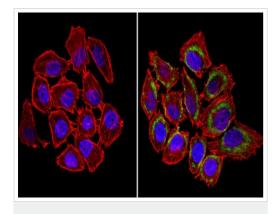

glycoprotein complex. In neurons, enriched in dendritic spines.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-nNOS (neuronal) antibody (ab5586)

ab5586 labelling nNOS (neuronal) in the cytoplasm of Mouse heart tissue (right) compared with a negative control (left) by Immunohistochemistry (formalin/PFA-fixed paraffin-embedded sections). To expose target proteins, antigen retrieval method was performed using 10mM sodium citrate (pH 6.0) microwaved for 8-15 min. Following antigen retrieval, tissues were blocked in 3% H2O2-methanol for 15 min at room temperature. Tissue sections were incubated with the primary antibody (1:20 in 3% BSA-PBS) overnight at 4°C. A HRP-conjugated anti-rabbit IgG was used as the secondary antibody, followed by colorimetric detection using a DAB kit. Tissues were counterstained with hematoxylin and dehydrated with ethanol and xylene to prep for mounting.

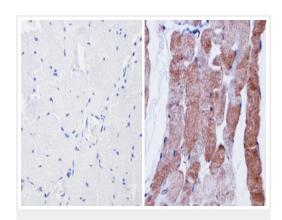

Immunocytochemistry/ Immunofluorescence - AntinNOS (neuronal) antibody (ab5586)

Immunocytochemistry/Immunofluorescence analysis of nNOS (neuronal) (green) showing staining in the cytoplasm and membrane of U251 cells (right) compared to a negative control without primary antibody (left). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were incubated with ab5586 in 3% BSA-PBS at a dilution of 1:100 and incubated overnight at 4°C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight-conjugated secondary antibody in PBS at room temperature in the dark. F-actin (red) was stained with a fluorescent red phalloidin and nuclei (blue) were stained with Hoechst or DAPI. Images were taken at a magnification of 60x.

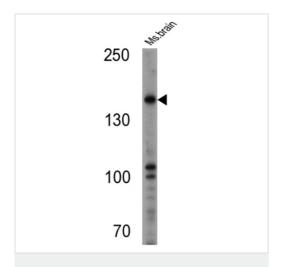

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-nNOS (neuronal) antibody (ab5586)

ab5586 labelling nNOS (neuronal) in the cytoplasm of Human testis tissue (right) compared with a negative control (left) by Immunohistochemistry (formalin/PFA-fixed paraffin-embedded sections). To expose target proteins, antigen retrieval method was performed using 10mM sodium citrate (pH 6.0) microwaved for 8-15 min. Following antigen retrieval, tissues were blocked in 3% H2O2-methanol for 15 min at room temperature. Tissue sections were incubated with the primary antibody (1:200 in 3% BSA-PBS) overnight at 4°C. A HRP-conjugated anti-rabbit IgG was used as the secondary antibody, followed by colorimetric detection using a DAB kit. Tissues were counterstained with hematoxylin and dehydrated with ethanol and xylene to prep for mounting.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-nNOS (neuronal) antibody (ab5586)

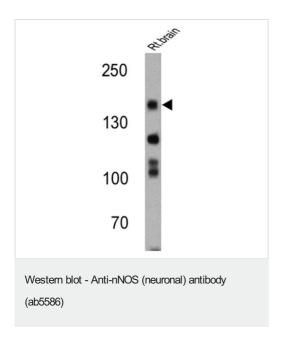

ab5586 labelling nNOS (neuronal) in the cytoplasm of Human skeletal muscle (right) compared with a negative control (left) by Immunohistochemistry (formalin/PFA-fixed paraffin-embedded sections). To expose target proteins, antigen retrieval method was performed using 10mM sodium citrate (pH 6.0) microwaved for 8-15 min. Following antigen retrieval, tissues were blocked in 3% H2O2-methanol for 15 min at room temperature. Tissue sections were incubated with the primary antibody (1:200 in 3% BSA-PBS) overnight at 4°C. A HRP-conjugated anti-rabbit lgG was used as the secondary antibody, followed by colorimetric detection using a DAB kit. Tissues were counterstained with hematoxylin and dehydrated with ethanol and xylene to prep for mounting.

Western blot - Anti-nNOS (neuronal) antibody (ab5586)

Anti-nNOS (neuronal) antibody (ab5586) at 1/500 dilution + Mouse brain cell lysate at 25 μg

Predicted band size: 160 kDa **Observed band size:** 160 kDa

Anti-nNOS (neuronal) antibody (ab5586) at 1/200 dilution + Rat brain cell lysate at 25 µg

Predicted band size: 160 kDa **Observed band size:** 160 kDa

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- · Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- · We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.cn/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
